#### Description

Hello,  
I have Titan Quest Anniversary Edition installed on my PC. I was playing it until the end of April (can't remember the exact date). Now I tried to start it again but always got the following error: "Failed to initialize DirectX 11. CPU:AMD Athlon(tm) II X3 450 Processor. GPU: ATI Radeon HD 4770" (see attachment).

I tried:

- running the game in legacy mode
- running the game in Windows XP compatibility
- using the -dx9 option
- using administrator privileges
- using an older version (tagged May 12th)

None of them worked.

Please give an advice on how to run the game again.

Thanks

#### History

##### #1 - 05/19/2019 01:32 PM - Anonymous

Edit: I found a way to run the game: if I select DX9 mode in Steam, the game runs. Before I only tried to add "-dx9" to a link, and it did not work.
